Welcome to the first page!

Place all your first page information here. For example, you may want to put your company logo, the invoice date, number, contact address of the customer, and then you'll want to loop through all the items in the invoice in a nice neat table.

Notice how the right-margin is a little funny?

You may need to increase the `margin-right` value on the `page` class attribute to make this margin look nicer on the page. Play with it.

Welcome to page 2!

You should now see this on the second page.

This is where you can place additional information on whatever else is important, i.e. how to pay, etc.
